

# Our Four World's First

Understanding that Video as the King of Content and Search as a basic human and organizational need, we created four game-changing World's First around our **Video Search Engine**.

## World's First Unified Search Engine

**Most formats** - Over 50 formats of Video, Audio, Images and Documents.

**Most advanced technologies** - Speech Recognition, Video OCR, Image Analysis, AI, etc.

**Number of languages supported** - over 100 for Speech and Documents, 26 for Video OCR

## World's First Video-Search-as-a-Service

Search the following elements:

- Speech (>100 languages)
- Text (>25 languages)
- Objects
- Motion
- Faces
- Emotions
- Offensive Content
- Custom Search

## World's First Video Search with Interactive Results

Co-created by Babbobox and Infini Videos, users can search and immediately view the search results as an interactive video. This is done by auto-generating clips from scenes extracted from videos. This fundamentally enables true pull/push personalized content.

## World's First Translated Video Search

You can now search videos in another language that you do not understand! What better way to extend your video's reach globally by presenting and allow viewers to search in the own languages.

We can search over 6,000 language pairs!

# Delivering THE POWER OF VIDEO

A Complete Suite of End-to-End Video Solutions

### Stream

You can now live stream your events with ease! Using our ultra-portable production kit!

### On-Demand

We make your videos available on-demand. Just think of us as your Enterprise YouTube channel

### Search

Imagine giving your viewers the power to search and retrieve different elements from inside your videos!

### Translate

Enable search and subtitles in more than 100 languages. Delivering a high contextual multimedia experience.

# Unleashing The TRUE Power of VIDEO
